

Public childminding on Samsø

In Danish: Dagpleje

Welcome to the public childminding on Samsø

In this folder you can learn about what the public childminding on Samsø has to offer.

The ambition of the public childminding on Samsø is to take part in giving children a good upbringing in safe, homely environments.

The homebased-childminding consists of nine small groups consisting of one adult and four to five children in the age from 0 to 3 years old. The stordagleje consist of two larger groups, which consist of three adults and ten children in total.

Your child is enrolled at the same childminder everyday, which gives the child a safe routine and creates a close relation between child and childminder.

In case of illness or the childminder's holidays the childminding-office will do it's best in order to enroll your child to the same guest-childminding-home each time it is needed. The guest-childminder will not be unknown to your child, as this person takes part of the same playing-group as your regular childminder. In our stordaglejer the child's guest-childminder usually is one of the other adults in the stordagleje.

The public childminding is divided into three playing-groups, which meet on a weekly basis. This means that the child knows the other childminders and hereby also the guest-childminder, when the child is in need of guest-childminding.

The public childminding is open 48 hours per week of which your child is able to be looked after at the childminder during the opening hours.

Your child is guaranteed a place in the public childcare.

Each day the activities starts around 9 am. It is therefore important, that you alert the childminder, if you intend to bring your child in later than 9 am. Exceptionally, if the activities start later than 9 am, you will receive notice.

Childminding-office
